ThyCa's Research Funding

ThyCa: Thyroid Cancer Survivors' Association, Inc., and our community of thyroid cancer survivors, loved ones, and medical professionals have joined together to raise funds for thyroid cancer research. Alone, one person can make a difference, but together, we have many more resources available, enabling us make a tremendous difference!

ThyCa has two Research Funds. One fund supports research of follicular-cell-derived thyroid cancer: papillary, follicular, anaplastic, and variants. Our second fund supports research of medullary thyroid cancer.

Both funds welcome all contributions. ThyCa is a 501(c)(3) all-volunteer nonprofit organization, and all donations are tax deductible.

Our research grants are open to all researchers and institutions worldwide. An independent expert panel of the American Thyroid Association (ATA), the leading professional organization of thyroidologists in the U.S., evaluates the grant proposals and selects the projects to be funded. ATA donates this crucial peer review service to ThyCa, ensuring that 100% of all money we raise for research does go directly into research.

In 2003, ThyCa proudly awarded our first thyroid cancer research grant. We have now awarded a total of six research grants. The grant recipients include researchers at the following institutions:

- Cochin Institut in France
- Harvard Medical School in Massachusetts
- Johns Hopkins University School of Medicine in Maryland
- M. D. Anderson Cancer Center in Texas
- Rush-Presbyterian-St. Luke's Medical Center in Illinois
- University Hospital Duesseldorf in Germany

We invite you all to join us in our quest to find a cure for all Thyroid Cancer. Our heartfelt thanks to you all for your wonderful support of ThyCa.
